

7 HOT WALL An organic and soft greenwall by Rick Eckersley really enhances this courtyard space. Boston Ivy (*Parthenocissus tricuspidata*) provides autumn colour and lush green foliage in spring, while Pink Bougainvillea (*Bougainvillea glabra*) provides a splash of colour in summer. Bearberry Cotoneaster (*Cotoneaster dammeri*) spills over the lower wall, trailing down towards the ground. Using plants to spice up plain walls is a great way to visually connect the interior and exterior of your home.
