

Easy on the eye

A pool with all the mod cons completes this home makeover

The owners of this property wanted to incorporate a modern, retro pool to complement a substantial renovation to update their home.

John D'Arcy of Award Pools & Spas worked closely with the client and their initial plans from gardener Rick Eckersley and architect John Matyas to ensure expectations were met. Careful planning in the early stages and meetings with the client

over several months allowed John to fine-tune the materials and layout, with everyone deciding on this timeless design.

"We try not to follow fads that in a few years date a project," John says. "Simplicity is the key, along with using products that last the test of time."

The blended interior of fine black, brown and gold pebble stone gives a classic touch to the

design and is enhanced by the natural stone coping and timber-decked surrounds.

Fitted out with all the mod cons, including a Waterco filter, Cleva-Quip pumps, Hurlcon salt chlorination, a PCC in-floor cleaning system and Spa Electrics lights, it is a "clear cut" pool that services the family's needs and will age well against the home renovation.
